Summary

DevOps Engineer with 2 years of experience at TCS, specializing in building fast CI/CD pipelines, automating multi-cloud infrastructure, and embedding security directly into developer workflows. Proven track record of scripting automation, scaling system reliability, and modernizing operations through Agentic AI.

Technical Skills

CI/CD & Version Control Azure DevOps, Jenkins, Git	Cloud & IaC AWS, Terraform, AWS CDK	Containers Docker, Docker Compose, Kubernetes	DevSecOps[Code Quality] SonarQube, Checkmarx, Checkov, Lint Scans
Scripting & Databases Python, Linux Shell (Bash), MySQL	AWS Cloud Services AWS S3, AWS Secrets Manager, AWS Lambda, AWS Glue		

Experience

- System Engineer, Tata Consultancy Services (TCS)08/2024 – Present | Bengaluru
- Engineered a centralized CI/CD blueprint repository using Azure DevOps, standardizing reusable templates across 12+ enterprise repositories and cutting setup time by 40%.
 - Integrated security quality gates (Checkmarx, SonarQube, Checkov) and code linters into CI pipelines, restricting analysis to PR-changed files to reduce scan times by 60%.
 - Automated infrastructure deployments using AWS CDK (Lambda, Glue, IAM, S3), while leveraging aws s3 sync for automated file deployments.
 - Established hybrid delivery workflows where Azure DevOps triggers downstream Jenkins jobs for multi-environment deployments to AWS.
 - Built Python scripts and pipeline workflows for AWS Secrets Manager provisioning, securing credentials across 30+ cloud resources.
 - Automated Azure DevOps repository governance using Terraform, enforcing branch policies and PR validations with 100% compliance.
 - Provided production support for enterprise Jenkins CI/CD pipelines, troubleshooting build, deployment, and configuration issues across multiple teams to ensure high pipeline availability.
 - Onboarded 8+ application teams onto standardized CI/CD platforms while providing production support, maintaining a 95%+ SLA.

Certifications

- | | | |
|---|--|---|
| AWS Certified Solutions Architect – Associate | Microsoft Certified: Azure Fundamentals (AZ-900) | Microsoft Certified: Azure Developer Associate (AZ-204) |
|---|--|---|

Projects

- Multi-Container 3-Tier Web Application, Docker, Docker Compose
 - Engineered a containerized microservices architecture using Docker and Docker Compose, orchestrating isolated frontend, backend, and database services.
 - Configured custom bridge networks, environment variable injection, and persistent volume mounts to ensure data durability and parity across development and staging environments.
- Full-Stack Expense Tracker Application, Docker Compose
 - ontainerized a full-stack financial tracking application using multi-stage Dockerfiles to optimize image sizes and reduce deployment overhead.
 - Orchestrated multi-container lifecycle and service dependencies via Docker Compose, creating an automated, reproducible environment for rapid local testing.

Education

B.E - Computer Science, Yenepoya Institute of Technology

2020 – 2024 | Mangalore
